

KEY FEATURES

- Cooling tower components complying to CTI STD.
- MOC: MSHDG / SS304 / SS316 / Pultruded FRP with option of fully Metallic tower.
- Standard 4 pole, IE2 Motor with option of IE3 / IE4 / FLP / VFD / Electronically Commutated.
- Equipped with Belt drive system with option of Direct drive / Gear drive.
- Axial fans with aerodynamically designed blade profiles with option of ultra-low noise fan.
- Pultruded FRP flap type air inlet louvers with option of cellular louvers.
- Ladder, platform and safety railing facilitate ease of maintenance.
- Aesthetic smooth finish on both sides of FRP panel and water basin.
- Multi cell option available with single cell capacity of 80 TR to 5000 TR.
- Option available for with / without basin.

RM SERIES

'RM' series is the modular design series of Induced Draft Counter Flow cooling towers. This series has redefined the FRP cooling tower industry based on its thermal performance and reliability. It is structurally robust to withstand harsh working conditions.

We are proud member of :

Advance Cooling Towers Pvt. Ltd.

Corporate Office: 405-406, Span Centre,
RK Mission Marg, Santacruz (W),
Mumbai - 400 054, India.

Works: Shed No.A-1/3, GIDC Indl
Estate, Killa-Pardi, Valsad,
Gujarat - 396125, India
